

UPWARDLY MOBILE

Realtime fleet tracking
with our DQT GPS App

KEEP TRACK OF YOUR FLEET WHEREVER YOU ARE

DQT GPS allows management and dispatch personnel to have comprehensive, up-to-the-minute information on fleet location from a smartphone or tablet.

Realtime Fleet Location and Reporting

DQT GPS for Android™ and iOS* smartphones or tablets allows organizations to dynamically track the location and status of their delivery fleet.

Integrating with our ODT tracking suite, DQT GPS gives managers and dispatch personnel detailed information on the whereabouts of vehicles, including speed and direction, with the ability to filter by group or location.

The result is better, more up-to-date visibility on delivery status and realtime reporting on driver performance, mileage, and route information.

**iOS version available Q1, 2016*

Check on your fleet - wherever you are
