

LESS TIME ON FLEET SERVICE

MEANS MORE TIME FOR CUSTOMER SERVICE

Asset Management

Fast and easy vehicle
maintenance management

Staying on top of vehicle maintenance is a laborious yet vital aspect of running any size of fleet.

Asset Management from DQ streamlines and automates many fleet maintenance management tasks, allowing you to focus more of your time where it matters: your customers.

As an optional module for **GPS Customers**, Asset Management alerts you when a vehicle is due for servicing as well as giving you current mileage details, driver management, driver inspection history, work order management, fuel logs, and more.

All this from an easy-to-use dashboard view - right in your web browser.

Contact us at sales@dqtech.com to find out more.

- Set up preventative maintenance and inspection schedules – based on time or by distance
- Track completed services and related expenses
- Track fuel purchases and fuel economy per vehicle
- Associate parts to work orders and track warranty details
- Track and report on fleet related vendors
- Track vehicle usage
- Detailed and customizable pre- and post-trip inspection for DVIR requirements
