

DQISPRUCEDNSSETUP RELEASE NOTES

Subject: DQISpruceDNSSetup Release Notes

Date: 10/15/2020

Version: 1.0

DQISpruceDNSetup v7.1.13

New version available in downloads – DQISpruceDNSetup v7.1.13 (20201015)

1. Updated code to deal with email/sms data from the DeliveryInfo field that is spread over multiple lines.
 - a. Because there is a limit of 20 characters per line, if a DeliveryInfo line is split and carried over to the next line, then those lines will be combined into 1 line.

DQISpruceDNSetup v7.1.12

New version available in downloads – DQISpruceDNSetup v7.1.12 (20200826)

1. Bug fix: The previous update statement would update all phone numbers of the same type to the same number, but because there can be multiples of the same phone type, the update statement must be changed to only update a specific phone number.

DQISpruceDNSetup v7.1.11

New version available in downloads – DQISpruceDNSetup v7.1.11 (20200821)

1. When parsing email/sms from the delivery info field, the first X number of lines that it tries to parse can now be set.
 - a. Found under Import tab.
