

DQT .NET/ASSET MANAGEMENT USER SETUP

Subject: .NET/Asset Management User Setup

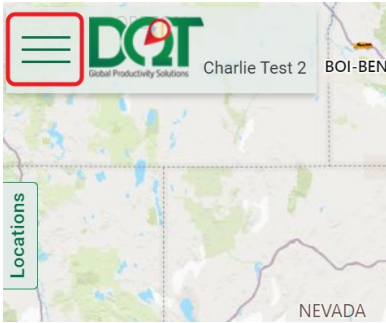

Created: 12/18/2020

Updated: 06/06/2022

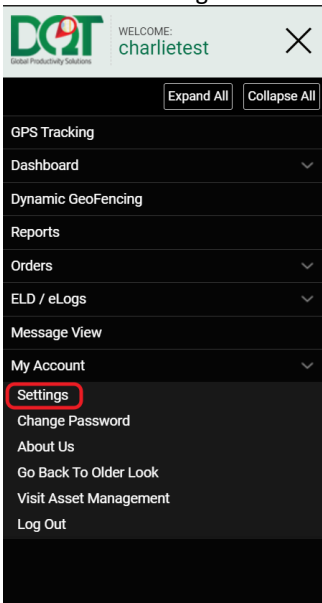

Version: 1.1

How to Create a .NET/AM User

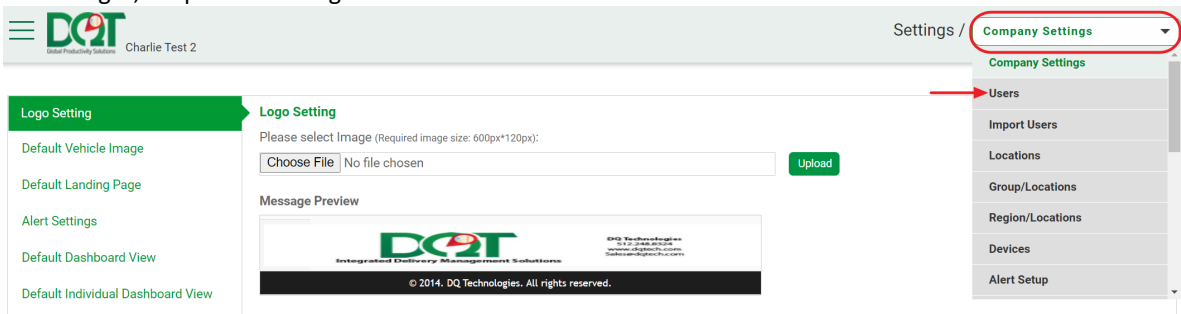

1. Login to DQTech.Net – <https://dqtech.net>
2. Select the three lines located in the top left hand corner of the screen.

3. Then select Settings.

4. On the right, dropdown Settings and select Users.

5. Next, select New User.

Settings / Users

User Name: Search Role: Admin Go

New User

User	Email	Role	Device	Can Edit Customers	Can Edit Devices	Can Create Geofences	Can Set Alerts	Customer Name	Approved	Locked	DriverId	SubCust	First Name	Last Name
------	-------	------	--------	--------------------	------------------	----------------------	----------------	---------------	----------	--------	----------	---------	------------	-----------

6. Create the users profile.

- a. First you will need to enter in the user's information where it's highlighted below.

User Information

First Name: Last Name: Email:

Role: Admin Username: Password:

Employee Code:

Can edit devices Can create Geofences Can edit customer accounts

Can set alerts Approved

Can Access AM

Customer Lists

Location Groups

All ALL DQT BSE Canada H-Auto

Laurie_Group RR SA

CANCEL SAVE

- b. Next, you will need to assign the permissions you want the user to have access to.

User Information

First Name: Last Name: Email:

Role: Admin Username: Password:

Employee Code:

Can edit devices Can create Geofences Can edit customer accounts

Can set alerts Approved

Can Access AM [Please click here for Date Settings](#)

Select AM User Role:

- Admin
- Assign
- ViewerUser

Location Groups

All ALL DQT BSE Canada H-Auto

Laurie_Group RR SA

CANCEL SAVE

NOTE: To give the user access to Asset Management you will select the box, Can Access AM, and then assign the level of permissions you want that user to have when in Asset Management.

- c. Lastly, you will need to assign the location groups you want the user to have access to.

The screenshot shows the 'User Information' form with the following fields and options:

- User Information** (Section Header)
- First Name: [Text Field]
- Last Name: [Text Field]
- Email: [Text Field]
- Role: Admin (Dropdown)
- UserName: [Text Field]
- Password: [Text Field]
- Employee Code: [Text Field]
- Permissions:
 - Can edit devices
 - Can create Geofences
 - Can edit customer accounts
 - Can set alerts
 - Approved
 - Can Access AM
 - [Please click here for Date Settings](#)
- Select AM User Role: Admin (Dropdown)
- Assign (Text Field)
- ViewerUser (Text Field)
- Location Groups** (Section Header, highlighted with a red circle)
- Location Group Selection:
 - All
 - ALL DOT
 - BSE
 - Canada
 - H-Auto
 - Laurie_Group
 - RR
